The Industry Leader in Additive Injection Systems for over 30 years...

Hammonds Additive Injection Systems are **used by leading industries** to **keep diesel equipment operational** and at **peak performance levels** with clean, dependable and **microbe-free diesel fuel**. Additive Injection also provides a fuel that **lubricates vital engine parts** and provides for **less maintenance and downtime**.

Hammonds offers a **variety of systems** designed for different flow rates, additive requirements and injection ratios. Additives are delivered **on-spec** directly into the fuel stream for **precise blending with no outside power source needed**.

Call or send a message today. A Hammonds Technical Rep will help you in determining which Hammonds System is best suited for your application.
