

Hammonds®

ADDITIVE INJECTION SYSTEMS for...

REFINERY

ENHANCED FUEL

Hammonds larger units can handle the high flow, (GPM) necessary at Refineries. This enables large volumes of stored fuel to be sterilized and free of any kind of microbial growth. In addition, many fuel enhancing additives can be added. These Hammonds injectors can create large volumes of “enhanced” fuels to be shipped via pipeline, tanker truck or ocean-going vessels.

Model 1000

Meets the requirements of delivery terminals and high volume delivery vehicles (100 to 1100 GPM). Precise and accurate blending.

Models 1400 - 2400

Precision injection of additives meeting the requirements of delivery terminals, pipelines and refineries.

Models 1400 - 2400

Model 1000

Turbine Injection Systems

Model 1400	Model 1600	Model 2000	Model 2400
300-1500 GPM	500-2000 GPM	600-4000 GPM	1000-8000 GPM
14" Flanges	16" Flanges	20" Flanges	24" Flanges

Turbine Injectors

Precision injection of additives meeting the requirements of delivery terminals, pipelines and refineries.
Models **4T**, **4L**, **6T**, **8T**, **10T** and **12T** available.
