

ADDITIVE INJECTION SYSTEMS for...

OFF-ROAD PROJECTS

Hammonds injectors can be a necessity for off-road projects where diesel fuel is stored and where expensive equipment needs to be properly maintained to avoid repairs and downtime. Additive injectors can provide much-needed clean, enhanced fuel supplies ensuring equipment longevity and less time lost to repairs.

Additive injectors will ensure that stored fuel remains sterile (free from microbial growth infestation) and adds lubricity protecting vital engine parts from wear associated with today's ultra-low sulfur diesel fuel.

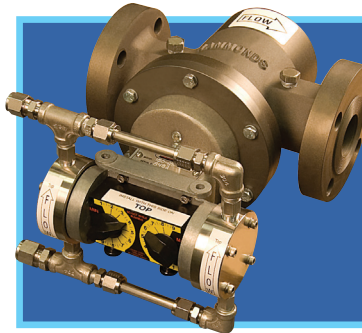

Additive injectors provide quick start-up from stored fuel sources and dependable performance on-site.

Model 150

Designed for Low Flow Delivery
Single or Dual Additive Injection
Minimum Flow Rate 7 GPM
Maximum Flow Rate 75 GPM

Model 600

Single or multiple additive injection.
Minimum Flow Rate 20 GPM
Maximum Flow Rate 250 GPM

Model 150

Model 600
